Cloud Engineer | AWS Certified Solutions Architect | DevOps & AI Automation Engineer

Professional Summary

Results-driven Cloud & AI Automation Engineer with 2+ years of hands-on experience designing, implementing, and optimizing cloud infrastructure across AWS, Azure, and GCP platforms. AWS Certified Solutions Architect with a proven track record of reducing cloud costs by 25% and achieving 99.9% uptime. Expert in Infrastructure as Code (Terraform, Ansible), containerization (Docker, Kubernetes), and n8n workflow automation. Recently expanded skill set to include building production-grade AI-powered automation workflows — including RAG chatbots, multi-step approval pipelines, vector ingestion systems, and multi-channel content factories — using n8n, LLMs (Qwen, OpenAI), and vector databases (Milvus). Seeking to leverage cloud infrastructure expertise and AI automation capabilities to drive operational efficiency at scale.

Technical Skills

Cloud Platforms: AWS (EC2, RDS, S3, VPC, CloudWatch, CloudTrail, Secrets Manager, DRS, Lightsail, Aurora Serverless, Lambda, ELB, Auto Scaling), Azure (Application Gateway, WAF, ARM Templates, DevOps Pipelines), GCP, Alibaba Cloud (ECS, OSS, VPC, RDS)
AI & Automation: n8n (workflow automation), LangChain, OpenAI API, Qwen LLMs, RAG pipelines, Milvus vector database, AI Agents, prompt engineering
DevOps & IaC: Terraform, Ansible, CI/CD Pipelines, Jenkins, GitHub Actions, Azure DevOps, Git
Containers & Orchestration: Docker, Kubernetes, AWS Load Balancer Controller, Docker Compose
Networking & Security: VPC Design, VPN (OpenVPN), Security Groups, NACLs, Route 53, SSL/TLS, WAF, IAM, Zero Trust Architecture
Monitoring & Logging: CloudWatch, CloudTrail, Prometheus, Grafana, ELK Stack
Databases & Storage: MySQL, PostgreSQL, AWS RDS, Aurora, Milvus, S3, EBS, EFS, Database Migration
Programming: Python, Bash, JavaScript, YAML, JSON, HCL (Terraform), PowerShell
OS: RHEL, Ubuntu, CentOS, Linux System Administration

Professional Experience

Cloud & AI Automation Engineer March 2024 – Present
Puffersoft (Private) Limited *Faisalabad, Pakistan*

- Reduced AWS cloud operational costs by **25%** through strategic implementation of reserved instances, spot instances, autoscaling policies, and resource optimization across EC2, RDS, and S3
- Architected and deployed enterprise-grade automated monitoring infrastructure using CloudWatch and CloudTrail with dynamic alarm systems, maintaining **99.9% uptime SLA**
- Engineered complete Infrastructure as Code solution converting all monitoring, networking, and compute configurations to Terraform, enabling reproducible deployments across multiple environments
- Deployed production-ready Kubernetes cluster on AWS EKS with Load Balancer Controller, implementing auto-scaling, load balancing, and high availability for containerized microservices
- Implemented backup and disaster recovery using AWS DRS achieving **RPO of 15 minutes and RTO of 1 hour** for critical systems
- Led migration of on-premises MySQL databases (**5TB+**) to AWS RDS with zero data loss and 2-hour downtime, improving query performance by **40%**
- Designed secure OpenVPN infrastructure with MFA providing encrypted remote access for **50+ remote team members**
- Integrated AWS Secrets Manager across entire infrastructure, replacing hardcoded credentials and ensuring SOC 2 and ISO 27001 compliance
- Implemented Azure Application Gateway with WAF to protect applications against OWASP Top 10 threats
- Automated Azure VM provisioning using ARM templates and Azure DevOps pipelines, reducing deployment time by **40%**

- Built and deployed **multiple production n8n automation workflows** for clients including: AI-powered CV shortlisting system, multi-tier document approval pipeline (HR → Finance → Exec), employee self-service request portal, social media content automation, PDF invoice-to-Excel converter, and RAG-based customer support chatbot integrated with Chatwoot
- Mentored 3 junior cloud engineers on AWS best practices, Terraform development, and troubleshooting

Cloud Engineering Intern January 2024 – March 2024

Puffersoft (Private) Limited *Faisalabad, Pakistan*

- Completed intensive AWS training covering core services, architecture patterns, and best practices
- Assisted in migration of legacy applications to AWS (EC2, S3, RDS, VPC) and infrastructure automation using Terraform and Ansible

Technical Consultant & Virtual Assistant July 2023 – January 2025

Raja Abdullah E-commerce Stores *United Kingdom (Remote)*

- Provided cloud hosting consulting and managed Amazon/Shopify product listings with SEO optimizations, increasing organic traffic by **30%**
- Automated administrative tasks with Python scripts, improving operational efficiency and reducing manual workload

Key Projects

DocSign – AI-Powered Multi-Tier Document Approval System | *n8n, Qwen, Milvus, PostgreSQL*

- Built a full document lifecycle automation system handling submission, AI policy validation, and sequential HR → Finance → Exec approval routing via webhook-driven decision handlers
- Implemented Arabic language support with Qwen LLM for policy compliance checking against HR policies stored in Milvus vector database
- Engineered vector ingestion pipeline accepting PDF/DOCX uploads via web form, chunking text (800-char with 150-char overlap), generating embeddings, and upserting to Milvus with full metadata
- Automated email notifications, rejection logging to Excel/Google Sheets, and status tracking at each approval stage

RAG Customer Support Chatbot | *n8n, Qwen, Milvus, Chatwoot, PostgreSQL*

- Deployed an AI support agent integrated with Chatwoot live chat, using Milvus-backed RAG for context-aware responses drawn from company knowledge base
- Implemented persistent Postgres chat memory, custom tool calling (submit requirements, notify representative), and agent routing to handle multi-turn conversations

AI Content Factory – Multi-Channel Marketing Automation | *n8n, OpenAI, Facebook, LinkedIn*

- Built an end-to-end content generation pipeline producing ads, social posts, landing pages, and email campaigns from a single chat trigger, with AI-generated images and structured output parsing
- Implemented human-in-the-loop approval flow: generated content is emailed for review; approved posts auto-publish to Facebook and LinkedIn, rejected content triggers AI regeneration

AI CV Shortlisting Workflow | *n8n, Qwen, Google Sheets*

- Automated CV screening pipeline: receives applications via webhook/form, extracts PDF text, evaluates candidates against configurable job criteria using Qwen AI agent, scores and routes by match threshold, and logs results to Google Sheets with automated email notifications

PDF Invoice to Excel Converter | *n8n, Qwen, JavaScript*

- Built an AI-assisted workflow that accepts PDF invoices via form submission, extracts structured data using Qwen LLM, detects content type automatically, and generates a styled XLSX file delivered via email

Production Kubernetes Cluster on AWS EKS

- Architected multi-AZ EKS deployment with AWS Load Balancer Controller, HPA, Cluster Autoscaler, and CloudWatch Container Insights for monitoring
- Reduced incident response time by **70%** through automated remediation with Lambda functions

Database Migration: On-Premises to AWS RDS

- Led end-to-end migration of 5TB+ MySQL databases using AWS DMS with continuous replication, achieving 40% performance improvement and 50% reduction in administration overhead

Education

University of Engineering and Technology Lahore, Pakistan
Bachelor of Science in Computer Science *May 2024*

Certifications & Courses

Cloud & DevOps: AWS Certified Solutions Architect – Associate, AWS Cloud Practitioner, AWS DevOps: Continuous Integration & Deployment, Terraform, Ansible Automation, Kubernetes Basics & Helm, Docker Fundamentals, Linux
AI & Automation: n8n Workflow Automation (KodeKloud)

Additional Information

Data Science: Hands-on experience with ML and data science, enabling effective collaboration on ML infrastructure, model deployment pipelines, and data processing optimization
Soft Skills: Technical Leadership, Cross-functional Collaboration, Technical Documentation, Mentoring, Problem Solving
Languages: English (Fluent), Urdu (Native)
